Internship at Tuck Advisors

Spring 2022

During 22S, I used my Byrne funds to sponsor an investment banking internship at Tuck Advisors. The internship primarily involved sourcing companies for private equity firms, building financial models in Excel, and creating presentation materials for clients. I learned a great deal in the internship, and on multiple occasions was able to sit in on calls with clients and private equity firms, which was an awesome experience. Throughout this time period, I was given the opportunity to take on larger responsibilities, including building models from scratch to present to clients and working directly with private equity firms in analyzing financial data sets. Overall, I learned a great amount about investment banking. The experience I gained at this internship also helped me land my next position at a larger firm this coming summer.

The Byrne funding was greatly helpful for this experience and without it, I would not have been able to spend my spring doing this. The scholarship funded my housing and all of my food, and I am incredibly grateful to have had this opportunity!
